Answer: Plains are shown in green colour, Dark green colour shows the high plains. In which direction river is flowing? The map and its legend can highlight not only the distance but also the complexity or ease of your trip using a public subway. Question 1. This value in highlighting spatial relationships is a key asset to a printed map legend. Types of Maps Legends There are many different types of maps, so the map legend varies according to the purpose of the map. Question 5. Contours are the most accurate and common form of showing the landforms. What do the light blue and dark blue colours indicate? The map legend is sometimes called the map key. Check your map area, and then consult the map key for a clearer definition of the part of the map you are seeing. The map legend's purpose is also to show relationships between certain things. The high rising places are shown in yellow colour, while the colour of high plateau is grey. A map legend shows colors, shapes, and symbols to define a certain characteristic of the map. Question 3. Answer: Conical hills: The contour lines are also of equal distance and equal round. If you are a meteorologist, you will consult weather maps and climate maps. The low height mountains is of dark grey or light brown colours and the high mountains are shown with the dark brown colour. The sea is shown in map by blue colour, sea nearby land surface is shown by light blue colour.

Project Work Make a local map and then discuss with colleagues in class. A map legend will colors and shapes for the political influences, that are dominant in a particular state or region. Plateau: The top of plateau is more or less flat is represented by very few contours but its sides are steep and they are shown by closely spaced contours on a map. Which are the two methods to show the landform? Early maps were first started getting made on tablets made from clay, and later onto parchment paper and finally to printed maps and book atlases.Á Á Today, there are many types of maps and their corresponding legends. Which are the three main landforms of surface? The OpenStax name, OpenStax logo, OpenStax book covers, OpenStax CNX name, and OpenStax CNX logo are not subject to the Creative Commons license and may not be reproduced without the prior and express written consent of Rice University. On more specialized maps, the map legend will differ. What are contour lines? Answer: Depth of sea is shown by various shades. With the help of local map, write in your exercise book. Answer: Contour: A contour is an imaginary line drawn on a map which joins the points of the same height above sea-level. Answer: There are two methods to show the landforms: Colour method Contours method. The map legend often also has a scale to help the map reader gauge distances.Á Á Map legends historically have been fixed elements on a printed map, but interactive digital maps often include dynamic map legends.What'sÁÁÁs on a Map Legend? Textbook content produced by OpenStax is licensed under a Creative Commons Attribution License license. If you are holding a hiking map, you can gauge the distance between your start and your turnaround loop using a printed map.Á Á MORE FROM REFERENCE.COM The local map contains following conventional signs. Using a Map Legend Map legends are often found in a top or bottom of a map, with a color or symbol and a description for what these colors and symbols mean.
